PROFESSIONAL SUMMARY

Software Engineer with over 10 years of experience in software development, specialized in web applications, cloud services (AWS), and backend automation. Proven track record in serverless architectures with AWS Lambda, CI/CD pipelines with Jenkins, and fullstack development using Java, Node.js, Angular, and Vue.js. Strong focus on code quality, remote collaboration, and solving complex technical problems.

TECHNICAL SKILLS

Languages: Java, JavaScript (Node.js), Python, PHP, C/C++, HTML5, CSS3, SQL

Frameworks & Libraries: Angular, Vue.js, Django, Bootstrap, Tailwind CSS, Ionic, Expo Go, NumPy, Pandas, Psycopg2

Cloud & DevOps: AWS Lambda, AWS CloudFormation, AWS CodeCommit, AWS CloudWatch, AWS DynamoDB, AWS Athena, Docker, Jenkins (CI/CD), SonarQube

Databases: PostgreSQL, MySQL, AWS DynamoDB, AWS Athena

Tools: Git, GitHub, GitLab, VS Code, Linux, L^AT_EX

Methodologies: CI/CD, version control, automated QA, remote development

WORK EXPERIENCE

Junior Software Engineer · Tranciti (Waypoint Telecomunicaciones) *Oct. 2021 – Jan. 2025*
Santiago, Chile (Remote)

- Developed serverless microservices with AWS Lambda in Java and Node.js for a GPS geolocation platform.
- Implemented infrastructure as code (IaC) with AWS CloudFormation and automated deployments using Jenkins and AWS CodePipeline.
- Enforced code quality with SonarQube and integrated Docker for reproducible development environments.
- Built customer-facing frontend module in Angular, and contributed to mobile apps using Titanium, Ionic, and Expo Go.
- Managed data storage with PostgreSQL and AWS DynamoDB/Athena depending on workload requirements.
- Be available via a 24/7 emergency hotline to handle urgent issues related to online services, as well as manage the call center's weekly shift schedules.

Frontend Developer · Innovación y Proyectos Kimun Ltda. *Dec. 2019*
Temuco (Remote Freelance)

- Developed and improved the frontend of the “Mundo de vegetales” web platform using HTML5, CSS3, and JavaScript.

Web Developer · Pontificia Universidad Católica de Valparaíso *Sep. 2014 – Apr. 2015*
Viña del Mar

- Continued development of an English language learning system for the Conicyt project using PHP, jQuery, and MySQL.

Web Developer · Oxalix
Viña del Mar

Mar. 2013 – Jan. 2014

- Built web forms and modules using Python and Django as the framework, integrated with a MySQL database.

Web Developer & IT Manager · Del Puerto Comunicaciones
Valparaíso

Jun. 2011 – Mar. 2014

- Developed and maintained client websites for a media agency using WordPress, HTML, CSS, and jQuery. Started as a 360-hour internship and continued as a permanent employee.

WordPress Developer · Serakin
Viña del Mar (Freelance)

Oct. 2016

- Built the corporate website for Serakin, a kinesiology center, entirely using WordPress.

Frontend Developer · Everis
Santiago (Hybrid)

Oct. – Dec. 2015

- Developed the customer panel frontend for the Consorcio website using Bootstrap and jQuery.

PERSONAL PROJECTS

Economic Indicators Bot (Telegram) | Node.js, REST API

- Telegram bot that responds to commands and displays real-time economic indicators using the mindicator.cl API.

Personal Website with Portfolio | Vue.js, Tailwind CSS, GraphQL

- Personal website in development featuring a business card, portfolio, and blog. Frontend built with Vue.js and Tailwind CSS; backend with GraphQL.

Tomython – Pomodoro Timer | Python, PyGTK, GStreamer

- Desktop Pomodoro timer with native Linux notifications, built using PyGTK and GStreamer.

Technical Blog in English | Python, Pelican

- Static blog generated with Pelican in Python, written in English.

EDUCATION

B.Sc. in Computer Science (Executive) · Federico Santa María Technical University
Valparaíso, Chile
Graduated. 2012 – 2015
