Quilpué, Chile

Professional Summary

Software Engineer with 10+ years of experience designing and delivering scalable software solutions, specializing in cloud-native architectures (AWS), backend automation, and full-stack web development. Hands-on expertise with serverless computing via AWS Lambda, infrastructure as code (IaC) using CloudFormation, and CI/CD pipelines with Jenkins. Proficient across the stack with Java, Node.js, Angular, and Vue.js. Committed to engineering best practices, code quality standards, and effective collaboration in distributed, remote-first environments.

Work Experience

Junior Software Engineer

October 2021 – January 2025

Tranciti (Waypoint Telecomunicaciones)

Santiago, Chile (Remote)

- Started in IT support, managing client-facing operations and improving end-user satisfaction through timely incident resolution.
- Engineered serverless microservices and AWS Lambda functions in Java and Node.js for a GPS geolocation platform, improving processing efficiency by 30%.
- Implemented infrastructure as code (IaC) with AWS CloudFormation, reducing deployment time by 40% through automated CI/CD pipelines in Jenkins.
- Enforced code quality standards with SonarQube and containerized development environments with Docker, cutting production defect rates by 25%.
- Built a customer-facing frontend module in Angular and contributed to cross-platform mobile apps using Titanium, Ionic, and Expo Go across 5 client deployments.
- Managed data storage with PostgreSQL and AWS DynamoDB/Athena based on workload requirements, optimizing queries to achieve up to a 20% reduction in response times.

Frontend Developer

December 2019

Innovación y Proyectos Kimun Ltda.

Temuco (Remote Freelance)

- Revamped the frontend of the “Mundo de Vegetales” web platform using HTML5, CSS3, and JavaScript, reducing page load time by up to 50% and improving user retention.

WordPress Developer

October 2016

Serakin

Viña del Mar (Freelance)

- Delivered a fully custom corporate website for Serakin (a kinesiology clinic), covering design, development, and deployment using WordPress.

Frontend Developer

October 2015 – December 2015

Everis

Santiago (Hybrid)

- Built the customer-facing dashboard for the Consorcio web portal using Bootstrap and jQuery, focusing on responsive layout and cross-browser compatibility.

Web Developer

September 2014 – April 2015

Pontificia Universidad Católica de Valparaíso

Viña del Mar

- Extended and maintained a web-based English language learning platform funded by Conicyt, built on PHP, jQuery, and MySQL, improving the user experience by 20%.

Web Developer & IT Lead

Del Puerto Comunicaciones

June 2011 – March 2014

Valparaíso

- Developed and maintained 5+ client websites for a media agency using WordPress, HTML, CSS, and jQuery. Transitioned from a 360-hour internship to a full-time position.
- Founded and led the company's IT department upon joining, establishing infrastructure and technical processes from the ground up.

Web Developer

Oxalix

March 2013 – January 2014

Viña del Mar

- Engineered web forms and functional modules using Python and Django, backed by a MySQL database, delivering a more robust and scalable software architecture.

Education

B.Sc. in Computer Science (Executive)

Federico Santa María Technical University
Graduated.

2012 – 2015

Valparaíso, Chile

Technical Skills

Languages: Java, JavaScript (Node.js), TypeScript, Python, PHP, C/C++, HTML5, CSS3, SQL

Frameworks & Libraries: Angular, Vue.js, Django, Bootstrap, Tailwind CSS, Ionic, Expo Go, Quarkus

Cloud & DevOps: AWS Lambda, AWS CloudFormation, AWS CodeCommit, AWS CloudWatch, AWS Glue, AWS Redshift, AWS QuickSight, Docker, Jenkins (CI/CD), SonarQube

Data & Data Engineering: PostgreSQL, MySQL, AWS DynamoDB, AWS Athena, ETL, web scraping (BeautifulSoup), data processing with Python

Tools: Git, GitHub, GitLab, VS Code, Linux, $\text{\LaTeX}$

Methodologies: CI/CD, version control, automated QA, remote development, DevOps, microservices, Test-Driven Development (TDD), Domain-Driven Design (DDD)

Soft skills: Adaptability, teamwork, problem solving, customer orientation, effective communication.

Personal Projects

GetOnBoard Job Listings Scraper

Python, BeautifulSoup, PostgreSQL, Docker

- Web scraping pipeline for structured extraction and storage of job listings, containerized with Docker and persisted in PostgreSQL.

Economic Indicators Bot (Telegram)

Node.js, REST API

- Chatbot that handles user commands and surfaces real-time Chilean economic indicators by integrating with the mindicador.cl REST API.

Personal Website with Portfolio

Vue.js, Tailwind CSS, GraphQL

- Full-stack personal site featuring a professional profile, project portfolio, and blog. SPA frontend powered by Vue.js and Tailwind CSS; data layer served via a GraphQL API.

Tomython – Pomodoro Timer

Python, PyGTK, GStreamer

- Productivity desktop app implementing the Pomodoro technique with native Linux desktop notifications, built with PyGTK and GStreamer for audio cues.

Technical Blog in English

Python, Pelican

- Static site generated with Pelican (Python), covering software engineering topics and written in English.

Languages

Spanish (native), English (written: advanced, spoken: intermediate)
