Quilpué, Chile

Professional Summary

Software engineer with a degree in Computer Science Engineering (*Ingeniero de Ejecución en Informática*) from Universidad Técnica Federico Santa María and over 10 years of experience building software, focused on web applications, AWS cloud services, and backend automation. Over 3 years of proven, hands-on experience with serverless architectures on AWS Lambda, CI/CD with Jenkins and GitLab, and fullstack development with Java, Node.js, Angular, and Vue.js. I care about code quality, work well in remote teams, and enjoy untangling complex technical problems.
I'm currently looking for opportunities in DevOps or frontend development, where I can contribute what I know and keep learning new technologies in a challenging professional environment.

Work Experience

Junior Software Engineer October 2021 — January 2025
Tranciti (Waypoint Telecomunicaciones) *Santiago, Chile*

Responsibilities

- Worked on the IT support team, handling customer requests.
- Built microservices and serverless functions with AWS Lambda in Java and Node.js for a GPS geolocation platform, improving efficiency by 30%.
- Implemented infrastructure as code (IaC) with AWS CloudFormation.
- Built a customer-facing frontend module in Angular.
- Supported mobile apps built with Titanium, Ionic, and Expo Go for 5 clients.
- Used PostgreSQL and AWS DynamoDB/Athena as database engines, depending on the type of workload.

Achievements

- Improved customer satisfaction through better support management.
- Cut deployment time by 40% by automating with Jenkins.
- Reduced production errors by 25% by introducing Docker and code quality tools.
- Optimized queries and reduced database response times by up to 20%.

Frontend Developer December 2019
Innovación y Proyectos Kimun Ltda. *Temuco*

Responsibilities

- Built and improved the frontend of the "Mundo de Vegetales" web platform using HTML5, CSS3, and JavaScript.

Achievements

- Reduced site load time by up to 50% and increased user retention.

WordPress Developer October 2016
Serakin *Viña del Mar*

Responsibilities

- Designed and developed corporate websites using CMSs like WordPress to manage and edit content, integrating the visual elements and features each site needed.

Achievements

- Improved the business's online visibility and accessibility.
- Made it easier to keep the site's information up to date.

Frontend Developer October 2015 — December 2015
Everis *Santiago*

Responsibilities

- Built the customer dashboard for the Consorcio website using Bootstrap and jQuery.

Achievements

- Improved the user experience with a more intuitive and accessible design.

Web Developer September 2014 — April 2015

Pontificia Universidad Católica de Valparaíso *Viña del Mar*

Responsibilities

- Continued the development of an English-learning system for a CONICYT project using PHP, jQuery, and MySQL.

Achievements

- Improved the user experience by 20%.

Web Developer and IT Department Lead June 2011 — March 2014
Del Puerto Comunicaciones *Valparaíso*

Responsibilities

- Built and maintained more than 5 websites for agency clients using WordPress, HTML, CSS, and jQuery. Started with a 360-hour professional internship and stayed on as a full-time employee.

Achievements

- The IT department was created when I joined the company, and I ended up leading it.

Web Developer March 2013 — January 2014
Oxalix *Viña del Mar*

Responsibilities

- Built web forms and modules with Python and Django, integrating MySQL.

Achievements

- Designed a more robust and scalable software architecture, ready for future updates.

Education

Computer Science Engineering Degree (Ingeniería de Ejecución en Informática) 2012 — 2015
Universidad Técnica Federico Santa María *Valparaíso, Chile*
Graduated

Technical Skills

Languages - Advanced: Java, JavaScript (Node.js), Python, PHP, C/C++, HTML5, CSS3, SQL. **Intermediate:** TypeScript.
Frameworks and Libraries - Intermediate: Angular, Vue.js, Django, Bootstrap, Tailwind CSS, Ionic, Expo Go, Quarkus.
Cloud and DevOps - Intermediate: AWS Lambda, AWS CloudFormation, AWS CodeCommit, AWS CloudWatch, AWS Glue, AWS Redshift, AWS QuickSight, Docker, Jenkins (CI/CD), SonarQube.
Data and Data Engineering - Advanced: PostgreSQL, MySQL. **Intermediate:** AWS DynamoDB, AWS Athena, ETL, web scraping (BeautifulSoup), data processing with Python.
Tools - Advanced: Git, GitHub, GitLab, VS Code, Linux, LaTeX.
Methodologies: CI/CD, version control, automated QA, DevOps, Test-Driven Development (TDD), Domain-Driven Design (DDD).

Personal Projects

- **GetOnBoard Job Listings Scraper** *Built with Python, BeautifulSoup, PostgreSQL, Docker.*
  Web scraping pipeline that extracts job listings and stores them in a structured format, containerized with Docker and persisted in PostgreSQL.
- **Economic Indicators Bot (Telegram)** *Built with Node.js and a REST API.*
  Telegram bot that responds to commands with real-time economic indicators, using the mindicador.cl API.
- **Personal Portfolio Website** *Built with Vue.js and Tailwind CSS, GraphQL backend.*
  Work-in-progress site with an intro page, a portfolio, and a blog.
- **Tomython – Pomodoro Timer** *Built with Python, PyGTK, and GStreamer.*
  Desktop Pomodoro timer with native Linux notifications, using PyGTK and GStreamer.
- **Technical Blog in English** *Built with Python and Pelican.*
  Static blog created with the Pelican generator in Python, published in English.

Languages

Spanish (native), English (written: advanced, spoken: intermediate).
